

Single-Bay Tri-Chemistry Battery Charger HGM3000-CHG

Versatile Charger for the XTS3000, XTS5000 and HT1000 Series Radio Batteries.

The HGM3000-CHG is a dependable and portable charger for the XTS3000, XTS5000 and HT1000 Series Radio Batteries.

You will be able to keep all your radio batteries (new, old, nickel, and lithium) fresh and fully charged with the Patriot Tri-Chemistry Charger.

If the power fails, take the Patriot Charger from your desktop to your vehicle. There is no downtime. Your radio is always ready.

Battery Features:

- Tri-chemistry charger allows safe and rapid charging of approved lithium ion, nickel cadmium and nickel metal hydride rechargeable battery packs.
- Rapidly charges batteries in 2.5 to 5 hours (depending on battery capacity).
- Honeywell® Batteries and OEM battery compatible including the IMPRES™ series of radio batteries for the XTS3000, XTS5000 and the HT1000 radio models.
- Automatic maintenance charging of nickel-based batteries when rapid charging is complete.
- Charges battery alone or while attached to radio (operating or non-operating radio).
- Charger is designed to be user friendly, with tri-color LED charge indicators.
- UL Approved AC Wall Transformer with retractable plug and 12V DC auto lighter adapter plug both included (100-240V AC, 50/60 Hz or 12V DC with supplied adapter plug).
- Light weight, versatile and portable, designed for desktop or DC in-vehicle use, with specifically supplied DC auto adapter plug.

Height: 3 Inches (Says 3.5", 8.9 cm in manual)
Weight: Approximately 0.5 lbs (0.25 kg)

IMPRES is a registered trademark of Motorola Inc.

Mobile Power Solutions

Warranty:

Our chargers are warranted against defects in materials and workmanship, for 12 months from date of shipment under normal use.

We are the Total Solution.

Honeywell® Batteries are available for hand-held bar code scanners/mobile computers, portable printers, two-way radios, and uninterruptible power supply systems (UPS). We also produce a line of battery chargers and design custom applications for clients' specific mobile power needs. We are proud to be a respected leader in mobile power technology, design and development.

The cornerstones of our business are product quality, customer service and attractive pricing.

We look forward to serving you.
